

Managing Queries for Widgets and Ticker

Last updated: 13 December 2024

This guide is designed to help users understand the new enhancements made to the **Queries**, specifically the separation of widget/ticker queries from regular queries. It provides step-by-step instructions to create, edit, and manage these queries, with accompanying screenshots for clarity.

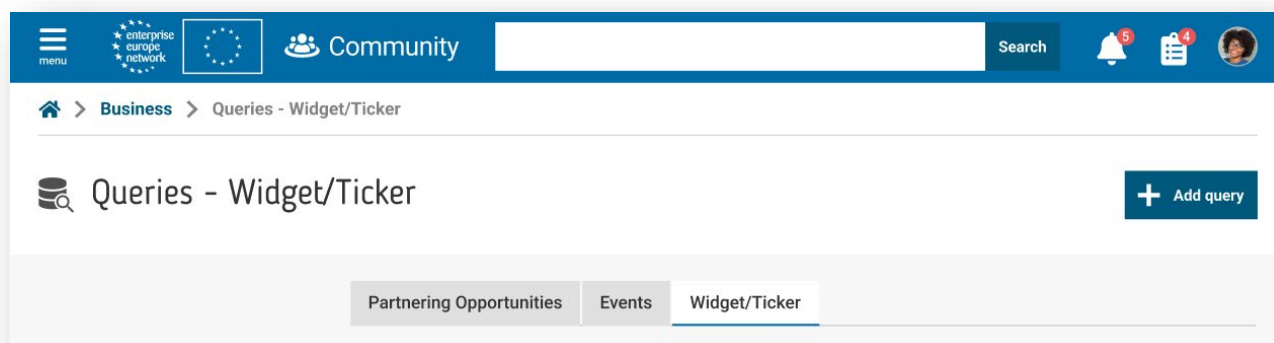

1. Introduction to Widget/Ticker Queries

What's New?

- A clear distinction is now made between **Email** notification queries and website **Widget/Ticker** queries.
- The first two tabs on the dashboard, **Partnering Opportunities** and **Events**, contain queries that generate email notifications for you or your clients.
- A new **Widget/Ticker** tab has been added to the Queries dashboard. This tab is dedicated to managing queries used for website widgets or tickers, if applicable, and keeps them separate from personal or client queries.
- Depending on your role, your access to **Widget/Ticker** queries may vary: **Advisors** can only view queries, while **Partner Administrators** can create, edit, or delete them.

2. Navigating the queries dashboard

1. From the main menu, select **Queries**. (or access via direct link: <https://een.ec.europa.eu/nexteen/dissemination/queries>)
2. Navigate to the **Queries** dashboard, where you will find three tabs, labeled **Partnering Opportunities**, **Events** and **Widget/Ticker**.

3. Creating a new query

Step 1: Start a new query.

1. Click the **Add query** button in the dashboard.
2. Navigate **Partnering Opportunities** or **Events** tab.
3. Apply desired filters to narrow down the results and find what you're looking for.
4. Click on **Save as a query** and fill in the mandatory **Name** and **Description** fields.
5. Select the type of query you want to create:
 - **Email:** Includes recipient options like "Me" or "Client", and allows you to se a recurrent email notification to a desired recipient
 - **Widget/Ticker:** Enables an HTML code that can be embedded into you website and display the wanted results for you visitors.

Step 2: Choosing the query target.

1. If you select **Email** option:
 - You need to specify a **Recipient**, allowing you to choose who will receive the email with the query results.
 - Select a **Frequency** to determine how often email notifications will be sent to the recipient.
 - Choose a start date under **Next execution** to specify when the email notifications should begin.
 - Click the **Save Query** button. The query is now saved into the system.

Click the Save query button below to generate and display the embedding code

Cancel Save query

Step3: Finalize the query.

1. Clicking the **Save Query** button:

- **Email target:** The query will be saved into the system.
- **Widget/Ticker target:** Embedding HTML codes are displayed, along with a **Copy** to clipboard button. After reviewing the embedding codes, click **Close** to return to the dissemination dashboard.

Widget code `<iframe src="https://een.ec.europa.eu/b2b/widget?queryId=af5e444d-a575-4423-9e08-017f20a4f03d" style="height: 1200px; width: 800px; " title="Enterprise Europe Network widget"></iframe>` Copy

Ticker code `<iframe src="https://een.ec.europa.eu/b2b/ticker?queryId=af5e444d-a575-4423-9e08-017f20a4f03d" style="height: 1200px; width: 800px; " title="Enterprise Europe Network ticker"></iframe>` Copy

Important: Displaying this query in a Widget or Ticker using the embedding code above requires prior **approval** for your domain. More info about this process is available in the [Whitelisting page](#) (Process tab).

Close

4. Editing details for an existing Query

Step 1: Locate the Query menu item.

1. Navigate to the **Query** dashboard.
2. Choose one of the desired **Query** tab and locate the query you want to edit
3. Click the icon  on the specific query.

Step 2: Edit details.

Allows you to modify details such as:

- Query name (on Widget/Ticker, Email types)
- Description (on Widget/Ticker, Email types)
- Contact Choice (on Widget/Ticker types)
- Recipient (on Email type)
- Frequency (on Email type)
- Next execution (on Email type)

Step3: Save your changes.

After making changes on the query details, click **Save query** to return to the **Query** dashboard.

5. Viewing and editing existing queries results

Step 1: Access queries dashboard.

1. Navigate to the **Query** dashboard.
2. Select the desired **Query** tab and locate the query you want to view/edit results for.

Step 2: View existing query result.

1. Choose one of the desired queries and click on the title.
2. You will be redirected to dissemination dashboard listing all the results which are specific to selected query.

Step3: Edit existing query filters.

1. Modify any of the filters on the dashboard.
2. Clicking **Save query** button will open the existing query details page.
3. You can either modify any of the information or **Save query** for applying the changes.

6. Impact on existing queries for your organisation

Existing queries in your organization will be automatically modified by the system. As part of this process, all existing email queries will automatically be split into two categories: **Email** queries, which are recipient user-based, and **Widget/Ticker** queries, which are used for embedding into websites. The newly created widget/ticker queries will then be reassigned to the appropriate PAs within your organization.

7. Where to get help

If you encounter any issues or need assistance, contact the [support team](#).
